About the University

Parul University, Vadodara, stands today as one of Gujarat's leading private universities - a vibrant hub of higher education, healthcare, research, and innovation. Its journey began with the Parul Arogya Seva Mandal Trust, which first made its mark in the healthcare sector before establishing Gujarat's first self-financed Homeopathic Medical College in Ahmedabad in 1993. This marked the beginning of a legacy committed to quality and holistic learning.

Over time, the vision grew into the Parul Group of Institutions, offering programs in Engineering, Technology, Ayurveda, Nursing, Physiotherapy, Pharmacy, Management, Architecture, and more. The Government of Gujarat established Parul University through the Gujarat Private Universities (Second Amendment) Act, 2015, recognizing its growth and impact.

Starting with 16 institutes and about 50 programs, the University has grown into a multidisciplinary ecosystem of 38 constituent colleges and 21 faculties offering Diploma, UG, PG, and Ph.D. programs, including seven constituent colleges that function as teaching hospitals. Today, it is home to over 65,000 students and 8,000 staff, including 4,500+ international students from 75+ countries, on a 125-acre eco-friendly campus equipped with modern classrooms, laboratories, hostels, sports arenas, and cultural spaces.

Parul University has earned NAAC accreditation with the highest A++ grade (3.55 CGPA) in its very first assessment cycle, UGC Category-1 status with Graded Autonomy, and the prestigious Centre of Excellence status by the State Government. In NIRF 2025, it ranked among India's top 150 universities, 41st in Pharmacy, and within the top 50 for Innovation. It has achieved 5-star ratings in Pharmacy, Engineering, Management, and Applied Sciences, and 4-star ratings in University and Medical categories in GSIRF-2024; along with Diamond Ratings in QS I-GAUGE, with Platinum in Medicine, Engineering, and Pharmacy. It also made a global debut in the Times Higher Education Impact Rankings 2025, securing ranks among India's top 50 for Quality Education (SDG 4), Gender Equality (SDG 5), Good Health & Well-being (SDG 3), and Partnerships for the Goals (SDG 17). The hospitals hold NABH accreditation with Platinum Level Certification for Digital Health Standards, along with the NABL-accredited Molecular Laboratory at Parul Sevashram Hospital.

True to its mission, Parul University Parul University delivers holistic education, fosters innovation, and advances sustainable development. With its achievements, global collaborations, and commitment to quality, it stands as Gujarat's leading private university, setting new benchmarks in higher education.

Vision

To make successful academic quests through entrepreneurship, research, modernization and partnerships, thus making PU the finest educational destination.

Mission

Bridging the gap between academia and career, by paying emphasis on development programs for both students and staff. Promoting healthy relationships between PU's existing students, alumni, teachers and staff. Forming associations with other universities and corporate firms of

the nation and the world. Presenting state of art infrastructure with high quality and energized work ethics.

Quality Policy

To strive towards attaining the status of global educational university by setting higher benchmarks in quality education to deliver excellence in academics, research, innovation and extension activities through the implementation of best practices adopted by renowned academic institutes in teaching and learning processes by continuously monitoring the effectiveness of the University's practices, fostering a quality learning ecosystem through state-of- the-art facilities to enable the beneficiaries to enhance their skillsets and knowledge, with enhanced emphasis on comprehensive development.

About the Institute

Faculty of IT and Computer Science (FITCS) is not just an educational institution; it's a gateway to a world of innovation and opportunity. With a diverse range of programs including BCA, BSc-IT, IMCA, MCA, and MSc-IT, MSc-Data Science, FITCS offers students the chance to explore their passions and carve their path in the dynamic realm of technology. Our curriculum, enriched by state-of-the-art facilities and expert faculty, ensures that every student's journey is one of holistic growth and discovery. Through a blend of theoretical learning and practical application, we empower our graduates to excel in their chosen field, armed with the skills, knowledge, and confidence to make a meaningful impact.

Parul Institute of Computer Application stands as a center of excellence and innovation in computer education, consistently ranking among India's top institutes—39th in Outlook-ICARE and 50th in India Today Rankings for BCA programs. These achievements reflect the institute's commitment to quality education, research-driven learning, and a student-focused academic environment. With an industry-aligned curriculum and strong emphasis on practical exposure, the institute prepares students to meet the dynamic challenges of the IT sector.

Recognized with the Academic Excellence Award by the WAC Book of Records, the institute continues to uphold its legacy through dedicated faculty, advanced infrastructure, and a vision to nurture globally competent IT professionals. Currently, the institute caters to a vibrant academic community comprising 659 students in Semester 3 and 804 students in Semester 5, including 551 MCA, 77 M.Sc. IT, 75 Integrated MCA, and 17 Data Science students. The institute's strength lies in its highly qualified team of approx 73 faculty members supported by 3 research scholars, who collectively contribute to academic excellence and innovation.

The Institute offers students the opportunity to specialize in AI- ML, Big Data Analytics, Cybersecurity, Cloud Computing, and Full-Stack Web Development. Each specialization equips students with advanced technical knowledge, practical skills, and industry-relevant competencies. They gain hands-on experience designing, analyzing and deploying solutions in their chosen domain.

To enhance employability and placement readiness, the Faculty of IT and Computer Science conducts Impact Training focusing on aptitude, communication, and interview skills. Students also undergo Global Certification Training and participate in Mock Placement Drives to gain real-world recruitment experience. During Company Placement Drives, Refresher Sessions are organized to align with specific employer requirements.

Together, these initiatives form a comprehensive framework that bridges academic learning with industry expectations, empowering students to achieve professional excellence and contribute meaningfully to the ever-evolving world of technology.

Vision

To make students contribute in the area of Computer Applications by developing innovative Computing professionals to achieve excellent standards of quality education by keeping Pace with rapidly changing technologies, with a promising future to bring a new level of Inspiration among the students.

Mission

The objective of the Program is to provide students with a strong foundation in computer science fundamentals, programming languages, software development, database management, and other relevant areas of computer applications. It aims to equip students with practical skills, hands-on experience, and problem-solving abilities essential for success in the IT industry. Additionally, the program supports students in their personal and professional growth by offering career guidance, mentorship, and opportunities for specialization in areas such as software development, web design, system administration, and more.

Code of Conduct for Students of Parul University

1. All students of Parul University shall compulsorily display their University ID cards by wearing them around their neck. If any student is found without an ID card on any day, he/she will be marked absent for that day.
2. The University expects all students to behave in a manner befitting a prudent person.
3. Students shall be dressed in a presentable manner which does not invite criticism from any quarter.
4. Students shall strictly adhere to class timings and be punctual in attending all classes.
5. Students shall display cordial, genial, and respectful behaviour towards their teachers.
6. Students should be polite, cooperative, and respectful in dealing with the employees of the University.
7. Students shall maintain the highest order of cleanliness in the classroom as well as in the college premises.
8. Students should not indulge in boisterous behaviour at any place on the university campus.
9. Students shall follow the directions issued in accessing common places such as the library, canteen, sports fields, auditorium, gymnasium, swimming pool, etc.
10. Students shall strictly follow the schedules given by the class teacher regarding assignments, Weekly Tests, examinations, and practicals, and shall complete the assigned work within the duration specified by their teachers.
11. Students shall follow the instructions given by the teacher during practical sessions in relation to the use of laboratories, workshops, implements, and equipment.
12. Whenever students have queries regarding their performance, either from the class teacher or from any office in the College/University, they should follow the laid-down procedures and approach the concerned authority with utmost respect.
13. Students shall pay all prescribed fees at the stipulated times and avoid being penalized for non-payment.
14. Students shall not indulge in unfair means during the conduct of Weekly Tests or internal and external examinations.
15. Students shall not indulge in unlawful assembly at any place on the campus.
16. Any problem encountered by students should be brought to the notice of the authorities immediately available in the College/University.
17. Students should never take law into their own hands and must report any matter of lawlessness or harassment to the College Authorities immediately, who will initiate suitable action.
18. Students shall participate in all national events such as Independence Day and Republic Day organized by the University.

19. Students should not indulge in any activities that adversely affect the reputation of the University.
20. Students shall not consume prohibited substances such as alcohol, narcotics, marijuana, heroin, cocaine, etc., and shall not keep in their custody or hostel premises any illegal objects or materials such as firearms, missiles, bombs, narcotics, alcohol, or other intoxicants.
21. Smoking and chewing of tobacco are strictly prohibited on campus.
22. The UGC has directed all universities to strictly implement anti-ragging measures. It is the responsibility of the institutions within the University to ensure the safety of newcomers and protect them from any incidents that may harm their physical or mental well-being. Any student found involved in ragging will face strict disciplinary action as per the *UGC Regulations on Curbing the Menace of Ragging in Higher Educational Institutions, 2009*.
23. Any violation of the provisions mentioned above will be viewed as an act of misconduct. The University, after conducting a thorough probe into such incidents, shall initiate strict disciplinary action against the delinquent students.

Code of Conduct for Department

As we embark on this journey together, it is essential that we maintain a positive and respectful learning environment for everyone. To ensure a harmonious and productive academic community, we have established a Code of Conduct that outlines the expected behavior of all FITCS Students.

1. Wearing an I-Card is Mandatory.
2. Treat fellow students, faculty, and staff with respect and courtesy.
3. Do not engage in any type of misconduct or academic cheating.
4. Attend classes regularly and on time; 75% attendance is Mandatory, else the student will be detained and must repeat the whole Semester again.
5. Fill in the leave form (Available with Office Assistants) before taking leave and get it signed by your MFT/Mentor and submit the duly signed leave form to the Office Assistant for seeking Attendance.
6. Note: only 5 days leave will be sanctioned per Semester.
7. If a student is caught using Mobile during Lab or Lecture Hours for the first time, the student's mobile will be taken in custody for 3 days with an apology.
8. For second offense of using mobile during Lab or Lecture Hours, the mobile will be taken in custody for 6 days and Parents will be called to meet the Dean/Principal/HOD.
9. If found shooting or sharing any unofficial video/photo, student shall be suspended for 1 week, phone in custody for 15 days, and Parents will be called.
10. Cheating in any Exam will lead to disqualification from the remaining Subject papers.

For questions or concerns regarding the code of conduct, contact HOD (IMCA).

Code of Discipline

- **Academic Integrity:** Be honest in all academic work; avoid plagiarism and cheating.
- **Respectful Behavior:** Treat everyone with respect; no discrimination, harassment, or bullying.
- **Attendance:** Attend classes regularly and participate actively.
- **Professionalism:** Exhibit professionalism in behavior, attire, and communication.
- **Resource Use:** Use university resources responsibly.
- **Community Engagement:** Participate in community service.
- **Respect:** Treat everyone with respect and dignity.
- **Compliance:** Follow all laws and university policies.
- **Integrity:** Maintain honesty in all activities.
- **Responsibility:** Be accountable for one's actions.

Unaccepted Behaviors

- **Dishonesty:** Plagiarism, cheating, or any form of academic fraud.
- **Disrespect:** Discrimination, harassment, bullying, or any form of disrespect.
- **Absenteeism:** Frequent unexcused absences.
- **Unprofessionalism:** Inappropriate attire, unpunctuality, irresponsible communication.
- **Resource Misuse:** Unauthorized or unethical use of university resources.
- **Disruption:** Actions that disrupt educational environment.
- **Substance Abuse:** Use or possession of illegal drugs or alcohol on campus.
- **Violence:** Any form of physical violence or threats.
- **Theft:** Stealing or damaging university or personal property.
- **Cyber Misconduct:** Unauthorized access or misuse of digital resources.
- **Insubordination:** Defying university authority.
- **Unauthorized Gatherings:** Unapproved gatherings or protests.
- **Unethical Behavior:** Actions compromising university ethics.

Disciplinary Measures

- **Warnings:** Verbal or written warnings for minor infractions.
- **Probation:** Specific conditions for improvement.
- **Detention from Academics:** Temporary restriction from attending.
- **Suspension:** Temporary suspension from university services.
- **Expulsion:** Permanent removal for serious violations.

About the Programme

Program Educational Objectives (PEOs)

- The statements below indicate the career and professional achievements that the **IMCA curriculum** enables graduates to attain.

PEO Number	Program Educational Objective Description
PEO1	Graduates will demonstrate advanced knowledge, skills, and competencies in computer applications, software development, database management, networking, cyber security, and other relevant areas of computer science and IT.
PEO2	Graduates will be able to identify, analyze, and solve complex IT problems using critical thinking skills, innovative approaches, and interdisciplinary knowledge.
PEO3	Graduates will engage in continuous learning, staying abreast of emerging technologies, industry trends, research developments, and best practices in computer applications and related fields. They will pursue opportunities for professional development, certifications, advanced studies, research work and lifelong learning to enhance their skills, knowledge, and expertise throughout their careers.

Program Outcomes (PLOs)

- Program outcomes are statements conveying the intent of a program of study.

PLO Number	Program Outcome Description
PLO1	Demonstrate a comprehensive understanding of fundamental concepts, theories, principles, and practices in computer science, including algorithms, data structures, programming languages, software engineering, and computer architecture.
PLO2	Acquire in-depth knowledge and expertise in specialized areas of computer applications such as database management, network technologies, cyber security, web and mobile technologies, cloud computing, artificial intelligence, and machine learning.
PLO3	Design, implement, and evaluate complex computing systems, architectures, algorithms, and solutions that meet specified requirements, performance criteria, and quality standards.
PLO4	Develop research skills, methodologies, techniques, and competencies to investigate, analyze, evaluate, and contribute to advancements in the field of computer applications through independent research projects, scholarly activities, or collaborative efforts.
PLO5	Apply creative thinking, problem-solving abilities, innovative approaches, and entrepreneurial mindset to design, develop, and implement novel solutions, technologies, products, or services that address specific challenges or opportunities in the IT industry.
PLO6	Communicate effectively and professionally with diverse audiences, including technical and non-technical stakeholders, through written reports, oral presentations, documentation, demonstrations, and interpersonal interactions.

Program Specific Learning Outcomes (PSOs)

- Program Specific Learning Outcomes

PSO Number	Program Specific Outcome Description
PSO1	Demonstrate a deep understanding of core concepts, theories, principles, and practices in computer science, including algorithms, data structures, programming languages, software engineering, and computer architecture.
PSO2	Acquire knowledge of research methodologies, techniques, tools, and practices to conduct independent research, analyze data, evaluate findings, and contribute to advancements in the field of computer applications.
PSO3	Design, develop, and evaluate innovative solutions, prototypes, projects, or products that address specific challenges, meet user requirements, leverage emerging technologies, and demonstrate practical application of knowledge and skills.

Theory Passing %: 40 **Practical Passing %**: 40

Syllabus of Courses

a) Course Name: Basic Mathematics

b) Course Code: 05191101

c) Prerequisite: Basic numeracy skill

d) Rationale : Mathematical aptitude refers to the ability to reason, think critically, and apply mathematical principles to solve problems and make sense of the world around us.

e) Course Learning Objective:

OBJ	Overview
OBJ1	Understanding and applying number theory concepts such as HCF, LCM, roots, ratios, and proportions.Mastering algebraic techniques including permutations, combinations, logarithms, and equations.
OBJ2	Building proficiency in arithmetic topics such as averages, percentages, profit-loss, interest, and partnership calculations.
OBJ3	Gaining speed and accuracy in solving real-life mathematical problems involving time, work, distance, and mixtures.
OBJ4	Applying concepts of progression (AM, GM, HM), mensuration, and probability in practical scenarios.
OBJ5	Interpreting and analyzing data through tabular and graphical representations including bar graphs, pie charts, and line charts.
OBJ6	Understanding and computing statistical measures such as mean and standard deviation for grouped and ungrouped data.

f) Course Learning Outcome:

CO	Description

CO1	Analyse and interpret mathematical problems, devise appropriate strategies, and apply relevant mathematical concepts and techniques to find solutions.
CO2	Comprehend and manipulate numerical information effectively, make accurate calculations, and interpret numerical data in various contexts.
CO3	Think critically and logically, recognize patterns and relationships, and construct logical arguments using mathematical principles.
CO4	Apply these concepts and techniques to solve real-world situations.

g) Teaching and Examination Scheme

Teaching Scheme					Examination Scheme

(b) Verbal Reasoning and Non - Verbal Reasoning (TextBook) By B. S. Sijwali and Indu Sijwali — New Delhi: Arihant

(c) Quantitative Aptitude for Competitive Examinations By R. S. Aggarwal — S. Chand Publishing,

Syllabus of Courses

a) Course Name: Fundamentals of Computer & PC Software

b) Course Code:05301104

c) Prerequisite:Basic knowledge of Computer and IT.

OBJ	Overview
OBJ1	To familiarize students with the fundamental concepts of Information Technology, including the basic components, functions, and structure of computer systems..
OBJ2	To provide an in-depth understanding of the working of computers and their real-world applications, enabling students to effectively utilize technology in academic and professional contexts.

d) Course Learning Outcome:

CO	Description
CO1	Explain the basic structure and functionality of computers and their role in different applications.
CO2	Identify and differentiate between various input and output devices, explaining their functions and applications.
CO3	Solve basic number conversion problems and analyze simple digital circuits using fundamental logic gates.
CO4	Evaluate memory management techniques and utilize basic internet functions, word processing, and spreadsheet tools in practical scenarios.

e) Teaching and Examination Scheme

-	-	2	-	1	-	-	20	-	30	50

SEE - Semester End Examination, **T** - Theory, **P** - Practical

f) Course Content:

W - Weightage (%), **T** - Teaching hours

Sr.	Topics	W	T
1	**Introduction of Computer** Overview of Computer, Characteristics of Computers, Architecture, Input/Output Peripheral Devices, Generations of Computers, Types and Applications of Computers.	10	5
2	**Input/Output Devices and Software** Computer Languages – Overview, Evolution, Types, and Characteristics; Input Devices – Types, OCR, OMR, MICR, Bar Code Reader; Output Devices – Types; Computer Software – Definition, Categories, Software-Hardware Relationship.	15	6
3	**Number Conversion in Computer** Decimal, Binary, Octal, Hexadecimal Systems; Number Conversions; Arithmetic Operations; Binary Complements; BCD and BCD Addition; Gray Code and Conversion; Fixed and Floating Point Representation.	20	9

Sr.	Topics	W	T
4	**Fundamentals of Gates** Basic, Derivative, and Universal Gates; Combinational and Sequential Circuits; Half/Full Adders and Subtractors; Flip-Flops – SR, D, JK, JK Master-Slave, T; Encoders, Decoders, Multiplexers, Demultiplexers.	20	9
5	**Memory Management** Primary Memory – Representation, Hierarchy, RAM, ROM Types; Secondary Storage – Magnetic Tape, Disk, Optical Disk, USB, Large Capacity Storage.	15	7
6	**Basics of Internet** Evolution, Terminology, Connectivity, Applications, Network Types and Topologies.	5	3
7	**Word Processing and Spreadsheet** Introduction, Objectives, Text Editing and Formatting, Table Manipulation, Cell Operations, Formulas and Functions in Excel.	15	6
	Total	100	54

g) Practical List:

Sr.	Topics

1	**Case study on salary calculation** Calculate Allowance based on conditions: 1. HRA is 10% on Basic Salary if Salary ¿ 20000. 2. DA is 25% on Basic Salary. 3. MA = 1000 (Executives), 700 (Officers), 500 (Assistants). 4. Gross Salary = Basic + HRA + DA + MA. 5. Professional Tax: Up to 5000 = 0, up to 10000 = 60, up to 15000 = 100, above 15000 = 150. 6. Annual Salary = Gross Salary × 12. 7. Income Tax (using nested IF formula). 8. Net Salary Payable = Annual Salary - Income Tax.
2	**Formatting alignment and creating table** Type the title: *Microsoft Word Computer Training Manual*. Font: Times New Roman, size 14, bold, blue, center-aligned. Paragraph formatting: Arial, size 11, justify, first-line indent.
3	**Word art and clip art** Prepare a visiting card for catering services and apply all formatting styles in Word 2007.
4	**Macro** Create a macro in MS Word.
5	**Invitation letter format** Format includes: Anand Institute of Information Science, Shri. Ramkrishna Seva Mandal, Opp. Town Hall, Anand 388001. Ph. No. (02696) 266062. Addressed to the Director/Principal.
6	**Worksheet exercise** Insert column, add rows with values, delete/relabel sheets, hide rows, insert new sheet and rename.
7	**Table exercise** Widen columns, add average row, insert rows, correct rainfall values, use formulas for totals.

8	**Table column exercises** Change column widths, calculate total sales (Quantity × Unit Price), use cell references and move data.
9	**Insert/remove columns of table** Add: Units Used, Unit Cost, Unit Charges, Standing Charge columns using formulas.
10	**Math functions** Enter data and use: SUM, AVERAGE, MIN, MAX, insert new rows/columns, copy formulas.
11	**Table formatting using background color** Format spreadsheet with different background colors for Student Grades.
12	**Calculate total sale and commission** Use tabular data to calculate total sales and respective commissions.
13	**Filter data of Excel sheet** Apply filters to count orders and calculate sums based on criteria like truck number, product, city, and date ranges.
14	**Conditional formatting** Apply rules to highlight specific cells in Excel data.
15	**Sorting** Sort given Excel sheet data by various columns.
16	**Typing exercise** Practice typing repetitive and patterned words like: queen, apples, wishes, deeds, goats, etc.
17	**Watermark and header/footer** Insert and remove watermark and headers/footers in Word.
18	**PowerPoint presentation** Create a new PowerPoint presentation.
19	**PPT with timing and sound effects** Add timings and sound transitions to a PowerPoint slide show.

20	**Access: Create database and tables** Create new database and tables using MS Access.
21	**Access: Relations between tables** Establish and manage relationships between tables in MS Access.

h) Reference Books:

By Morris Mano — PHI

(b) **Introduction to Information Technology**
By ITL Education Solution Limited — Pearson Education — 2012

(c) **MS OFFICE 2007**
By Vikas Gupta — Wiley

(d) **Computer Fundamentals**
By Anita Goel — Pearson Education — 2011

(e) **Digital Fundamentals**
By Thomas L. Floyd — Pearson

Syllabus of Courses

a) **Course Name**:Fundamentals of Web Development

b) **Course Code**:05301105

c) **Prerequisite**:Basic approach of Web Development.

d) **Course learning Objective**:

OBJ	Overview
OBJ1	The objective of this course is to familiarize students with concepts of fundamentals of web development and website designing.

e) **Course Learning Outcome**:

CO	Description
CO1	Explain the fundamentals of computer networks and apply the Bootstrap framework to design responsive web pages.
CO2	Create structured web pages using HTML and advanced features of HTML5 for enhanced functionality and design.
CO3	Design a pleasing and well-structured web layout using CSS and CSS3 techniques.
CO4	Develop interactive web elements and dynamic content using JavaScript for client-side scripting.

f) Teaching and Examination Scheme

SEE - Semester End Examination, **T** - Theory, **P** - Practical

g) Course Content:

W - Weightage (%), **T** - Teaching hours

Sr.	Topics	W	T
1	Introduction to Internet: Overview of Internet, Concept of Internet, Evolution, Concepts of Intranets and Extranets, Internet Applications such as Email, Telnet, FTP, World Wide Web, Concept of Web page (static, dynamic), Active Scripting languages (Server side, Client side), Web Designing, Development and Publishing, HTTP, URL registration, browsers, Web server.	20	9
2	Working with HTML: Internet Overview including Concepts, Evolution, Intranet and Extranet Concepts, Internet Applications such as Email, Telnet, FTP, Worldwide Web, Websites (Static, Dynamic), Active Scripting Languages (Server Side, Client Side), Web Design, Development, Publishing, HTTP, URL registration, browser, web server.	20	9
3	Use of Style Sheets: Basics to Style Sheets, Formatting Text using Style Sheets, Formatting Paragraphs, Displaying Graphics, External Style Sheet, Internal Style Sheet, Inline Style Sheet.	25	12
4	Layout and Navigation of Webpage: Create navigation aids, area-based layouts, format tables, and create user forms using JavaScript and external content.	25	12

5	Web Hosting: Publishing web pages, HTML for Email.	10	3
	Total	100	45

h) Practical List:

Sr.	Description
1	Print your name
2	Set Title
3	Bold, italic, underline and break tag
4	Print names in different colors
5	Different style font
6	Use different font size. Print a paragraph where each sentence uses a different font.
7	Print a paragraph about a book, with underlined, italic, and bold formatting for book title and author.
8	Print ”ORANGE” with each letter using different heading size.
9	Print squares of numbers 1–10 using superscripted 2 (e.g., $10^2 = 100$).
10	Print your name using different heading sizes for each letter.
11	Create ordered lists with numbers, lowercase/uppercase letters, lowercase/uppercase roman numerals.
12	Create unordered lists with disc, square, and circle bullets.
13	Create a definition list for Colors and Fruits & Vegetables with nested items.
14	Add heading followed by horizontal line (100% width) and related paragraph.
15	Print some preformatted text.
16	Create a definition list with 5 items.

Sr.	Description
17	Create links to 5 different websites (open in new window).
18	Display 5 images with titles and spacing between each.
19	Display an image with a border of size 2, width 200, height 200.
20	Make an image a clickable link to a search engine (open in new window).
21	Make an image link to itself (opens image alone in browser).
22	Add links to various search engines (Google, Yahoo, etc.).
23	Add a bottom-of-page link that jumps to top.
24	Add a top-of-page link that jumps to bottom (with back-to-top link).
25	Demonstrate hyperlinks to email using ‘mailto:‘.
26	Display the word ”PARUL” using special HTML characters.
27	Demonstrate inline CSS styling.
28	Demonstrate internal CSS styling.
29	Demonstrate external CSS styling.
30	Demonstrate CSS comments.
31	Demonstrate all font properties using external CSS.
32	Demonstrate use of class selector.
33	Demonstrate use of ID selector.
34	Demonstrate use of HTML selector.
35	Insert image via CSS, repeat vertically, and add background color.
36	Demonstrate all text properties using inline CSS.

Sr.	Description
37	Demonstrate list properties using external CSS.
38	Demonstrate margin properties using internal CSS.
39	Demonstrate padding properties using external CSS.
40	Demonstrate border properties using external CSS.
41	Apply red dashed top border and blue double bottom border.
42	Apply borders to only three sides with different styles.
43	Demonstrate image thumbnail that opens in a new tab.
44	Demonstrate CSS styling for hyperlinks.
45	[Reserved]
46	[Reserved]
47	[Reserved]
48	Create a table: Name, Post, Salary (e.g., Geeta – Manager – 20000).
49	Format table with background colors.
50	Create a web page with user registration form.
51	Create a student registration form with validation and CSS formatting.

Syllabus of Courses

a) Course Name: Fundamentals of Programming using C

b) Course Code: 05301106

c) Prerequisite: Basic approach of problem-solving methods.

d) Course learning Objective:

OBJ	Overview
OBJ1	To familiarize students with the fundamentals of Information Technology, including basic computer architecture, operating systems, and software applications.
OBJ2	To develop logical thinking and problem-solving skills for implementing solutions using the procedure-oriented programming language C.

e) Course Learning Outcome:

CO	Description
CO1	Understand the basic concepts and features of the C programming language and its applications in software development.
CO2	Explain the role of classes and pre-processors in C programming, and utilize pre-processor directives effectively in code.
CO3	Implement arrays, strings, and pointers to solve complex programming problems and manage data efficiently.
CO4	Design and implement programs using functions, structures, unions, and file operations for structured and efficient code management.

SEE - Semester End Examination, **T** - Theory, **P** - Practical

g) Course Content:

W - Weightage (%), **T** - Teaching hours

Sr.	Topics	W	T
1	Introduction of C: History, Algorithm and flowchart, Structure of C, Elements of C: Character set, C Tokens, Keywords, Identifiers, Variables, Constant Data Types, Comments, C Programming Applications and Importance, Operators: What is operator? Types of operators, Built-in Operators: Input/output operators, Concept of header files & header file functions.	10	5
2	Importance of Classes and Pre-Processor: Introduction, Different pre-processors: #include, #define, Importance. Storage Classes: Automatic, External, Static and Register Variables. Control Statements: if, if-else, nested if, switch. Looping: for, nested for, while, do while. Other statements: break, continue, goto, exit.	10	5
3	Use of Array: Declaration, Initialization, Access of one-dimensional and two-dimensional arrays, Programs using 1D and 2D arrays: adding, multiplying, transposing matrices, sorting, searching arrays.	20	9
4	Use of Function, Structure and Union: Definition, Need, Types of Functions: Built-in and User-defined. Categories: With/without arguments and return values. Recursion, Scope & Lifetime of variables. Structures: Declaration, Initialization, Comparison, Arrays of structures, Nested structures, Structures with functions, Unions.	25	12

Sr.	Topics	W	T
5	Working with Strings and Pointers: Understanding pointers, Address of a variable, Declaring and initializing pointers, Pointer arithmetic, Pointers and arrays, Function arguments using pointers. Strings: Declaration, Initialization, Input/Output, Concatenation, Comparison, String handling functions, Table of strings.	20	9
6	Files Structure and Operations: Opening, Reading, Writing, and Closing Files in text and binary modes. Command-line arguments. File functions: `fprintf()`, `fscanf()`, `getc()`, `putc()`, `fgetc()`, `fputc()`, `fseek()`, `feof()`.	15	5
	Total	100	45

h) Practical List

Sr. No.	Program Description
1	WAP to Add Two Integers
2	WAP to Add Two Floating Point Numbers
3	WAP to Print ASCII Value of a Character
4	WAP to Find Quotient and Remainder
5	WAP to Swap Two Numbers
6	WAP to Find Area of Circle
7	WAP to Find Simple Interest
8	WAP to Sum of 5 Subjects and Find Total and Percentage
9	WAP to Find Gross Salary of an Employee
10	WAP to Find Whether a Number is Even or Odd
11	WAP to Find Roots of a Quadratic Equation
12	WAP to Check Whether a Character is an Alphabet or Not

Sr. No.	Program Description
13	WAP to Find Sum of Natural Numbers
14	WAP to Find Factorial of a Number
15	WAP to Print Following Patterns
16	WAP to Print Fibonacci Series
17	WAP to Find GCD of Two Numbers
18	WAP to Find LCM of Two Numbers
19	WAP to Display Characters from A to Z Using Loop
20	WAP to Reverse a Number
21	WAP to Check Whether a Number is Palindrome or Not
22	WAP to Find Prime Numbers Between Two Intervals
23	WAP to Check Whether a Number is Perfect
24	WAP to Create Pyramid and Structure
25	WAP to Draw Pascal's Triangle
26	Write a Menu-driven Program Using Switch Case to Calculate Area of Circle, Area of Square, Area of Sphere
27	Write a Menu-driven Program Using Switch Case to Create Calculator
28	WAP to Calculate Square and Cube of a Given Number Using Function
29	WAP to Swap Two Numbers Using Function
30	WAP to Calculate Area of Circle Using Function and With All Four Categories
31	WAP to Add Two Distances Using Function (Use Inch and Feet)
32	WAP to Calculate Sum of Elements of 1D Array Using Function
33	WAP to Find Factorial of a Number Using Function

Sr. No.	Program Description
34	WAP to Add Two 2D Arrays Using Function
35	WAP to Store Records for Books and Display Using Structure
36	WAP to Display Records of Employee Details Using Array of Structure
37	WAP to Display Marks of 3 Subjects for 3 Students and Calculate Subject-wise and Grand Total
38	WAP to Display ID, Name and Percentage of a Student Using Structure and Function (Pass by Value)
39	WAP to Create Structure Student (Name, Roll), Accept from User and Display from Another Function
40	WAP to Access Addresses of Different Types of Variables Using Pointer
41	WAP to Swap Two Integers Using Pointers
42	WAP to Compute Area and Perimeter of Rectangle Using Pointers as Function Parameters
43	WAP to Store and Display Values of Array Using Pointers
44	WAP to Read String from Terminal Using `scanf()` and `gets()`
45	WAP to Pass String to a Function and Find its Length
46	WAP to Concatenate Two Strings and Copy String 1 to String 2
47	WAP to Sort Elements in Lexicographical (Dictionary) Order
48	WAP to Convert Binary to Decimal and Vice Versa
49	WAP to Read Name and Marks of *n* Students from User and Store in a File
50	WAP to Append Data of *n* Students to Existing File if it Exists
51	WAP to Write All Members of an Array of Structures to a File Using `fwrite()` and Read/Display It

Syllabus of Courses

a) **Course Name**: Communication Skills-1

b) **Course Code**: 05193102

c) **Prerequisite**: Knowledge of English Language till 12th standard

d) **Rationale** :This course builds basic communication competence in grammar, reading, writing, and speaking for academic and professional contexts.

e) **Course Learning Objective**:

OBJ	Overview
OBJ1	Knowledge of LSRW is essential for Students

f) **Course Learning Outcome**:

CO	Description
CO1	Understand the importance of creative and critical thinking.
CO2	Develop four basic skills (LSRW)
CO3	Expand vocabulary with proper pronunciation.
CO4	Comprehend the basics of English grammar.
CO5	Read & write effectively for a variety of contexts.
CO6	Develop confidence in speaking skills.

g) Teaching and Examination Scheme

SEE - Semester End Examination, **T** - Theory, **P** - Practical

h) Course Content:

W - Weightage (%), **T** - Teaching hours

Sr.	Topics	W	T
1	**Time Sense (Using Timeline) & Introduction to Phonetics** • Concept of time sense and tenses • Present, past, and future tense forms • Use of timelines to explain tenses • Introduction to Phonetics and IPA • English Speech Sounds	13	2
2	**Articles, Determiners & Prepositions** • Types and rules of articles and determiners • Classification of prepositions • Usage rules and exceptions	13	2

Sr.	Topics	W	T
3	**Subject–Verb Agreement** • Basic rules of subject–verb agreement • Agreement with special subjects • Common errors in agreement	13	2
4	**Active & Passive Voice** • Concept and structure of voice • Rules for active–passive conversion • Voice usage across tenses	13	2
5	**Meetings & Greetings** • Types of greetings and meetings • Language used in meetings • Meeting etiquette	7	1
6	**Just A Minute (JAM)** • Purpose and structure of JAM • Elements of effective speaking • Common speaking barriers	7	1
7	**Story Writing Using Hints** • Understanding given hints • Story structure and sequencing • Use of tenses and connectors	13	2
8	**Notice, Memo & Circular** • Purpose and format • Language and tone	7	1

Sr.	Topics	W	T
9	**Paragraph Development** • Elements of a paragraph • Unity and coherence • Types of paragraphs	7	1
10	**Reading Comprehension (Level of Difficulty – Basic)** • Types of reading skills • Understanding main ideas and details • Vocabulary in context	7	1
	Total	**100**	**15**

i) Practical List

Sr.	Practical Exercise
1	**Time Sense (Using Timeline) & Introduction to Phonetics** • Timeline-based sentence construction activity. • Tense identification exercise. • Error correction task. • Pronunciation practice using IPA symbols and English speech sounds.
2	**Articles, Determiners & Prepositions** • Exercises on correct usage of articles and determiners. • Identification and classification of prepositions. • Sentence completion and error correction activities.
3	**Subject–Verb Agreement** • Practice on basic subject–verb agreement rules. • Exercises involving special subjects. • Error identification and correction.

Sr.	Practical Exercise
4	**Active & Passive Voice** • Conversion of active voice to passive voice. • Conversion of passive voice to active voice. • Voice transformation across different tenses.
5	**Meetings & Greetings** • Role-play on formal and informal greetings. • Mock meeting activities. • Practice of meeting etiquette and communication.
6	**Just A Minute (JAM)** • One-minute speech on assigned topics. • Practice for fluency and confidence. • Peer evaluation and feedback session.
7	**Story Writing Using Hints** • Story writing using given hints. • Organizing ideas in logical sequence. • Use of appropriate tenses and linking words.
8	**Notice, Memo & Circular** • Drafting notices for different situations. • Writing professional memos. • Preparing official circulars using standard format.
9	**Paragraph Development** • Writing paragraphs on given topics. • Practice on unity and coherence. • Developing descriptive, narrative and argumentative paragraphs.

Sr.	Practical Exercise
10	**Reading Comprehension (Level of Difficulty – Basic)** • Reading comprehension exercises. • Identifying main ideas and supporting details. • Vocabulary building through contextual understanding.

Syllabus of Courses : Elective-I

a) **Course Name**:Financial Accounting

b) **Course Code**: 05101131

c) **Prerequisite**: Basics knowledge of commercial business terms.

d) **Course learning Objective**:

OBJ	Overview
OBJ1	To acquire fundamental knowledge of accounting and its application.

e) **Course Learning Outcome**:

CO	Description
CO1	To acquire fundamental knowledge of accounting and its application.
CO2	Able to manage the stock, cash, assets, and liabilities efficiently.
CO3	Able to solve various financial problems through applied accounting principles.
CO4	Able to analyze and manage profit and loss statements effectively.

f) Teaching and Examination Scheme

Teaching Scheme					Examination Scheme					
Lecture Hrs/Week	Tutorial Hrs/Week	Lab Hrs/Week	Seminar Hrs/Week	Credit	Internal Marks			External Marks		Total
					T	CE	P	T	P	
3	-	-	-	3	20	20	-	60	-	100

SEE - Semester End Examination, **T** - Theory, **P** - Practical

g) Course Content:

W - Weightage (%), **T** - Teaching hours

Sr.	Topics	W	T
1	Basic Accounting: Introduction, definition, advantages and limitations. Importance and scope, concepts and conventions, generally accepted accounting principles. Branches of Accounting include Financial Accounting, Cost Accounting, and Management Accounting.	17	8
2	Basic Concepts: Double entry framework, types of account, rules of debit-credit. Explanation of basic accounting terms, and concepts of journals, ledgers, purchase book, sales book, and cashbook.	27	12
3	Preparation of Financial Statements: Includes preparation of Journal, Ledger, Trial Balance, Trading Account, Profit and Loss Account, and Balance Sheet.	35	16
4	Application of Computers in Accounting: Use of Tally accounting software and its features.	21	9
	Total	100	45

h) Reference Books:

(a) **Accounting for Management (TextBook)**
By Bhattacharya & Dearden — Tata McGraw Hill — 5th Edition

(b) **Elements of Book Keeping & Accountancy**
By B.S. Shah & Sons — B.S. Shah & Sons

(c) **Accounting With Tally**
By Nadhani K. K — BPB Publications

(d) **Financial Accounting**
By R.L. Gupta & V.K. Gupta

(e) **Fundamental Accountancy**
By S.N. Maheshwari

Syllabus of Courses : IEP

a) Course Name:Open-Source Tool*

b) Course Code:05301107

c) Prerequisite: Understanding of the relevant programming language and familiarity with version control systems like Git for collaborative development and contribution.

d) Course learning Objective:

OBJ	Overview
OBJ1	Open source tools epitomize global collaboration, empowering developers to collectively refine and innovate software on a worldwide scale. The transparency inherent in open source fosters trust and security, as users can scrutinize source code for vulnerabilities, ensuring a resilient and dependable software ecosystem. Open source tools provide a cost-effective paradigm, offering powerful solutions for free, democratizing access to high-quality software and lowering financial barriers to innovation.
OBJ2	Develop proficiency in utilizing various open-source software tools and technologies, applying them in real-world scenarios such as software development, data analysis, system administration, and collaborative projects, thereby gaining hands-on experience with industry-relevant applications.

e) Course Learning Outcome:

CO	Description
CO1	Understand Linux history, file system structure, and master basic commands for efficient system navigation.
CO2	Learn essential commands and shortcuts for Vim and Emacs text editors, along with proficiency in package management using tools like `apt` and `yum`.

CO3	Master shell scripting basics, including script structure, variables, and implementation of conditional statements, loops, and automation using tools like Ansible.
CO4	Acquire knowledge in web server configuration (Apache, Nginx), virtualization concepts (VirtualBox), and containerization with Docker.
CO5	Gain proficiency in version control (Git), continuous integration (Jenkins), and database basics, including SQL operations and monitoring tools like Prometheus.

f) Teaching and Examination Scheme

Teaching Scheme					Examination Scheme					
Lecture Hrs/Week	**Tutorial Hrs/Week**	**Lab Hrs/Week**	**Seminar Hrs/Week**	**Credit**	**Internal Marks**			**External Marks**		**Total**
					T	CE	P	T	P	
3	-	2	-	4	20	20	20	60	30	100

SEE - Semester End Examination, **T** - Theory, **P** - Practical

g) Course Content:

W - Weightage (%), **T** - Teaching hours

Sr.	Topics	W	T
1	**Introduction to Linux** Definition and History of Linux, Linux File System Structure, Basic Linux Commands, Text Editors (e.g., Vim, Emacs), Introduction to Vim and Emacs, Essential Commands and Shortcuts, Package Managers (e.g., `apt`, `yum`), Package Installation and Updates, Dependency Management, Package Removal and Cleanup, Shell Scripting Basics and Script Structure, Variables and Input/Output, Conditional Statements and Loops, Web Servers (e.g., Apache, Nginx), Introduction to Web Servers, Virtual Hosts and Configuration, SSL/TLS Configuration.	25	11
2	**Virtualization (e.g., VirtualBox)** Introduction to Virtualization, Creating and Managing Virtual Machines, Snapshot and Cloning, **Containerization (Docker)**: Introduction to Docker, Docker Images and Containers, Networking with Docker.	20	5
3	**Web Development Basics (HTML, CSS)** HTML Basics and Structure, Introduction to CSS, Styling HTML Elements with CSS.	15	5
4	**Python Scripting and Configuration Management** Python Syntax and Variables, Control Flow and Loops, Functions and Modules. **Ansible**: Introduction to Configuration Management, Ansible Playbook Structure, Managing Configurations with Ansible. **Jenkins**: Introduction to CI/CD, Jenkins Installation and Configuration, Building and Deploying with Jenkins.	15	7
5	**Version Control and Databases Git**: Version Control Concepts, Git Basics (Commit, Branch, Merge), Remote Repositories and Collaboration. **SQLite**: Introduction to Databases, SQL Basics (Queries and CRUD Operations), Connecting Databases to Applications. **Prometheus**: Introduction to Monitoring, Setup and Configuration, Alerting with Prometheus.	15	7
6	**Final Project** Project Planning and Execution, Presentation of Final Projects.	10	5
	Total	100	40

h) Practical List:

Sr.	Description
1	Create a setup and install a Linux distribution, and write basic commands of Linux and practice.
2	Configure, understand and apply basic navigation and editing commands and shortcuts for VIM and Emacs.
3	Installing, updating, and removing packages in a Linux environment.
4	Understanding creation and running of shell scripts.
5	Installing and configuring a web server.
6	Installation and configuration of virtual machines using VirtualBox / VMware Workstation.
7	Creating, building, and running containers using Docker.
8	Create a simple webpage using HTML and CSS.
9	Understanding and execution of basic Python scripts.
10	Understanding of scripting and writing playbooks using Ansible.
11	Set up a basic CI/CD pipeline using Jenkins.
12	Initialize a repository, commit, and create branches in Git.
13	Set up a database and perform basic queries using SQL.
14	Set up basic monitoring and alerts using Prometheus.

Syllabus of Courses : IEP

a) Course Name: SQL on Oracle Cloud

b) Course Code:05301108

c) Prerequisite: Basic computer skills, an understanding of fundamental database concepts.

d) Course learning Objective:

OBJ	Overview
OBJ1	This course teach students concepts of relational databases and the powerful SQL language and then prepares them to earn the Oracle Database SQL Specialist certification credential.

e) Course Learning Outcome:

CO	Description
CO1	Describe the basic structure of a SQL query and how it interacts with relational databases.
CO2	Explain the purpose and functionality of SQL JOINs (INNER JOIN, LEFT JOIN, RIGHT JOIN, FULL JOIN) and how they are used to combine data from multiple tables. Also, recall the various SQL functions and understand their syntax and usage.
CO3	Write SQL queries using subqueries to manipulate and control access to data in a database.
CO4	Explain how sequences, synonyms, indexes, and views improve database management and query performance by integrating advanced subqueries.

f) Teaching and Examination Scheme

Teaching Scheme					Examination Scheme					
Lecture Hrs/Week	Tutorial Hrs/Week	Lab Hrs/Week	Seminar Hrs/Week	Credit	Internal Marks			External Marks		Total
					T	CE	P	T	P	
3	-	2	-	4	20	20	20	60	30	100

SEE - Semester End Examination, **T** - Theory, **P** - Practical

g) Course Content:

W - Weightage (%), **T** - Teaching hours

Sr.	Topics	W	T
1	**Introduction to SQL** — This topic covers relational database concepts, data models, the entity relationship model, and how to establish relationships between tables.	5	2
2	**SQL SELECT Statement** — This topic teaches how to retrieve, sort, and restrict data using a select statement with various clauses. The topic also covers how to provide dynamic values to a SQL statement.	10	4
3	**SQL Functions** — This topic is all about SQL functions. It covers Character, Numeric, Date, Conversion, CAST(), General, JSON, and Group functions. It also covers Conditional Expressions.	10	6
4	**Displaying Data from Multiple Tables** — This topic is about using joins to display data from multiple tables. It covers Natural Joins with USING and ON Clause, Self-Joins, Nonequijoins, OUTER Joins, and Cross Joins.	10	4
5	**Using Subqueries** — This topic is about subqueries and problems that subqueries can solve. It covers types of subqueries: Single-Row, Multiple-Row, and Multiple-Column Subqueries.	15	7

Sr.	Topics	W	T
6	**Data Definition, Data Manipulation and Data Control Language** — This topic categorizes the main database objects and teaches how to create, modify, and drop these objects using Data Definition Language (DDL) commands. It covers how to manipulate data using Data Manipulation Language (DML) commands and how to control data changes using Data Control Language (DCL) commands.	20	9
7	**Creating Sequences, Synonyms, Indexes and Views** — This topic covers database objects like Sequences, Synonyms, Indexes, and Views. It also covers how to find information about database objects using dictionary views.	20	8
8	**Advance Subqueries** — This topic is about advanced subquery features like multiple-column, scalar, and related subqueries, and how to manipulate data with subqueries.	10	5
	Total	100	45

h) Reference Books:

Sr.	Description
1	Retrieving Data Using the SQL SELECT Statement
2	Reporting Aggregated Data by Using Group Functions
3	Using Set Operators
4	Managing Tables by Using DML Statements
5	Using DDL commands
6	Retrieving information about database objects using Data Dictionary Views
7	Creating Sequences, Synonyms and Indexes
8	Creating Views
9	Managing Schema Objects

Sr.	Description
10	Controlling User Access
11	Manipulating Data
12	Managing Data in Different Time Zones

Syllabus of Courses : IEP

a) Course Name: SAP S/4HANA Introduction

b) Course Code: 05301109

c) Prerequisite: Basic knowledge about computer applications.

d) Course learning Objective:

OBJ	Overview
OBJ1	Three tiered construct of an application viz. database, application, user interface is required.

e) Course Learning Outcome:

CO	Description
CO1	Analyze the core features of SAP S/4HANA, apply navigation techniques effectively across the interface, and evaluate systemwide concepts to optimize business processes within an enterprise context.
CO2	Define key concepts and processes involved in the Purchase to Pay, Plan to Produce, and Order to Cash cycles.
CO3	Define fundamental concepts and terminologies of Financial Accounting and Management Accounting, including recording and reporting of financial transactions.
CO4	Describe the key components and functionalities of SAP services in relation to SAP Activate methodology and best practices.

f) Teaching and Examination Scheme

Teaching Scheme					Examination Scheme					
Lecture Hrs/Week	Tutorial Hrs/Week	Lab Hrs/Week	Seminar Hrs/Week	Credit	Internal Marks			External Marks		Total
					T	CE	P	T	P	
4	-	-	-	4	20	20	-	60	-	100

SEE - Semester End Examination, **T** - Theory, **P** - Practical

g) Course Content:

W - Weightage (%), **T** - Teaching hours

Sr.	Topics	W	T
1	SAP S/4HANA Overview – Describing SAP S/4HANA	4	2
2	Navigation – SAP Fiori, Using the SAP Business Client, Using SAP Logon (GUI)	16	9
3	Systemwide Concepts – Describing Organizational Units, Describing Master Data Concepts	10	4
4	Logistics – Purchase to Pay Processing, Plan to Produce Processing, Order to Cash Processing	24	10
5	Accounting – Financial Accounting, Management Accounting	24	10
6	Human Capital Management and SuccessFactors	4	2
7	Embedded Analytics	10	4
8	SAP Activate and Best Practices	4	2
9	SAP Services	4	2
	Total	100	45

Syllabus of Courses : IEP

a) Course Name:Cyber Security Fundamental I

b) Course Code: 05301110

c) Prerequisite: knowledge of Cyber Security Fundamentals, Linux, Cryptography, Steganography, and Windows Command Line.

d) Course learning Objective:

OBJ	Overview
OBJ1	To provide foundational knowledge of cyber security principles and IT infrastructure, emphasizing the importance of data protection, network security, and secure system configurations.
OBJ2	To introduce basic Linux operating system concepts and practical skills, including secure data handling through techniques such as steganography, while fostering logical thinking and hands-on lab proficiency.

e) Course Learning Outcome:

CO	Description
CO1	Recall and define the fundamental concepts and principles of information security, including the CIA triad, authentication, authorization, and auditing/accounting, as well as common cyber jargon and terminology. Additionally, identify and describe the types of cybercriminals and cybercrime activities they engage in.
CO2	Understand the Linux design philosophy, basic shell commands, process to assume superuser privileges, steps to create, modify, and delete users and groups, and process to configure account profiles.
CO3	Evaluate emerging issues and real-world examples in cryptography, including the impact of quantum computing on cryptography, and the role of cryptography in securing IoT devices.

CO4	Utilize the Windows Command Line for file system navigation, system information retrieval and management, user account administration, networking tasks, and connectivity management, along with the basics of batch scripting for efficient automation.

f) Teaching and Examination Scheme

Teaching Scheme					Examination Scheme					
Lecture Hrs/Week	**Tutorial Hrs/Week**	**Lab Hrs/Week**	**Seminar Hrs/Week**	**Credit**	**Internal Marks**			**External Marks**		**Total**
					T	CE	P	T	P	
3	-	2	-	4	20	20	20	60	30	100

SEE - Semester End Examination, **T** - Theory, **P** - Practical

g) Course Content:

W - Weightage (%), **T** - Teaching hours

Sr.	Topics	W	T
1	**Basics of Information Security** Definition and Importance, Needs of Information Security, Cybersecurity umbrella, Data vs Information, CIA Triad: Confidentiality, Integrity, and Availability. Authentication, Authorization, and Auditing/Accounting. Case Study: Analyze a real-world organizational failure in implementing CIA principles and propose strategies. Cyber Jargons: Attacks, Threats, Vulnerabilities, and Risk. Differentiating Threats, Vulnerabilities, and Risk with real breach incident case study and preventive suggestions.	25	10
2	**Linux Fundamentals** Identify the Linux Design Philosophy, Linux Distributions, and Installation. Enter Shell Commands and get help with Linux. Understand CLI and File System Hierarchy. User and Group Management: Assume Superuser Privileges, Create, Modify, and Delete Users and Groups, Configure Account Profiles.	25	10

Sr.	Topics	W	T
3	**Cryptography and Steganography** Basics: Encryption, Decryption, Key Types, Key Exchange. Cryptography Types: Classical and Modern, Cryptographic Attacks, Hashing, Digital Signatures, Cryptocurrency. Hands-on Lab: Practice Encryption, Hashing, Backups using Cryptool 2.1. *Steganography*: Concepts, Methods (Text, Image, File, Video, Audio), Tools and Software. Detection and Countermeasures: Steganalysis Techniques, Legal and Ethical Considerations. Hands-on Lab: Practice all forms of Steganography.	25	10
4	**Windows Command Line** Introduction to Command Line, Navigation and File System Management. System Information, User Account Management. Networking and Connectivity Tools, Basic Batch Scripting for Automation.	25	10
	Total	100	40

h) Practical List:

Sr.	Lab Activity Description
1	**Lab Setup and Installation of Virtual Machine** - Explore different types of Virtual Machines: VirtualBox and VMware. - Install operating systems using OVA/OVF/ISO formats (Linux, Windows).
2	**Practice on CIA Triad Concepts** - **Confidentiality:** Encryption and Steganography techniques. - **Integrity:** Implement Hash functions and Checksums. - **Availability:** Setup and test backup strategies.
3	**Perform Encryption using Encipher.it** - Practice online encryption and decryption tools to demonstrate confidentiality.
4	**Implement Integrity Mechanisms** - Practice generating and verifying Hashes and Checksums.
5	**Cryptool 2.1 – Classical and Modern Cryptography** - Use Cryptool 2.1 to explore historical and contemporary cryptographic methods.
6	**Steganography Techniques** - Perform practicals in Text, Image, File, Video, and Audio Steganography.
7	**Virtual Lab Setup** - Prepare a complete virtual environment using VM tools and configurations.

Sr.	Lab Activity Description
8	**Linux Practical: User and Group Management** - Create, delete, and modify users and groups. - Manage permissions and configure account profiles.
9	**Windows Command Line Basics – Part 1** - Execute commands like `cd`, `dir`, `echo`, `cls`, etc. for file system navigation.
10	**Windows Command Line Basics – Part 2** - Practice file operations: create, copy, move, delete, and rename files and directories.
11	**Capture The Flag (CTF): Over The Wire** - Hands-on challenges to enhance cybersecurity skills using real-world scenarios.
12	**SSH Practical** - Connect securely to remote machines using SSH. - Explore authentication, port forwarding, and secure file transfer.

Course Lecture/Laboratory/Tutorial Planning
Lesson Plan – Programming in C

Lec No.	Topic	A
1	Introduction to C	20-Jul-26
2	History of C	22-Jul-26
3	Algorithm and Flowchart	24-Jul-26
4	Structure of a C Program	27-Jul-26
5	Character Set in C	29-Jul-26
6	C Tokens	31-Jul-26
7	Keywords and Identifiers	03-Aug-26
8	Variables and Constants	05-Aug-26
9	Data Types in C	07-Aug-26
10	Comments in C	10-Aug-26
11	Applications and Importance of C	12-Aug-26
12	Operators in C	14-Aug-26
13	Input/Output Operators	18-Aug-26
14	Header Files in C	20-Aug-26
15	Introduction to Preprocessors	22-Aug-26
16	#include and #define Directives	25-Aug-26
17	Storage Classes in C	27-Aug-26

Lec No.	Topic	A
18	Decision Making Statements (if, if-else, nested if)	29-Aug-26
19	Switch Statement	01-Sep-26
20	Looping Statements (for, while, do-while)	03-Sep-26
21	Jump Statements (break, continue, goto, exit)	05-Sep-26
22	Introduction to Arrays	08-Sep-26
23	One-Dimensional Arrays	10-Sep-26
24	Two-Dimensional Arrays	12-Sep-26
25	Array Operations (Addition, Multiplication)	16-Sep-26
26	Matrix Transpose	18-Sep-26
27	Sorting Arrays	21-Sep-26
28	Searching Arrays	23-Sep-26
29	Introduction to Functions	25-Sep-26
30	Types of Functions	28-Sep-26
31	Function Arguments and Return Values	30-Sep-26
32	Recursion	03-Oct-26
33	Functions with Arrays	06-Oct-26
34	Scope, Visibility and Lifetime of Variables	09-Oct-26
35	Structures in C	13-Oct-26
36	Arrays and Nested Structures	16-Oct-26
37	Unions in C	20-Oct-26

Lec No.	Topic	A
38	Introduction to Pointers	23-Oct-26
39	Pointer Operations and Expressions	27-Oct-26
40	Pointers with Arrays and Functions	30-Oct-26
41	Strings in C	17-Nov-26
42	String Operations and String Handling Functions	20-Nov-26
43	Introduction to File Handling	24-Nov-26
44	Text and Binary File Operations	28-Nov-26
45	File Handling Functions (fprintf, fscanf, fgetc, fputc, fseek, feof)	03-Dec-26

Lab Plan – Programming in C

Lab No.	Lab Experiment	A
1	WAP to Add Two Integers	23-Jul-26
2	WAP to Perform Basic Arithmetic Operations	31-Jul-26
3	WAP to Print ASCII Value of a Character	08-Aug-26
4	WAP to Find Quotient and Remainder	13-Aug-26
5	WAP to Swap Two Numbers	18-Aug-26
6	WAP to Calculate Area of a Circle	24-Aug-26
7	WAP to Calculate Simple Interest	26-Aug-26
8	WAP to Calculate Total and Percentage of Five Subjects	05-Sep-26
9	WAP to Calculate Gross Salary of an Employee	14-Sep-26
10	WAP to Check Whether a Number is Even or Odd	17-Sep-26
11	WAP to Find Roots of a Quadratic Equation	21-Sep-26
12	WAP to Check Whether a Character is an Alphabet	24-Sep-26
13	WAP to Find Sum of Natural Numbers	03-Oct-26
14	WAP to Find Factorial of a Number	13-Oct-26
15	WAP to Print Patterns	22-Oct-26
16	WAP to Generate Fibonacci Series	31-Oct-26
17	WAP to Find GCD and LCM of Two Numbers	18-Nov-26
18	WAP to Perform Number-Based Programs (Palindrome, Prime, Perfect, Reverse)	24-Nov-26
19	WAP Using Functions (Arrays, Structures, Pointers, Strings)	26-Nov-26
20	WAP on File Handling	05-Dec-26

Lesson Plan –FOW (T)

Lec No.	Topic	A
1	Introduction to Internet	20-Jul-26
2	Concept of Internet	22-Jul-26
3	Evolution of the Internet	24-Jul-26
4	Intranet and Extranet	27-Jul-26
5	Internet Applications	29-Jul-26
6	Email Services	31-Jul-26
7	Telnet Protocol	03-Aug-26
8	FTP (File Transfer Protocol)	05-Aug-26
9	World Wide Web (WWW)	07-Aug-26
10	Static Web Pages	10-Aug-26
11	Dynamic Web Pages	12-Aug-26
12	Active Web Pages	14-Aug-26
13	Server-Side Scripting Languages	18-Aug-26
14	Client-Side Scripting Languages	20-Aug-26
15	Web Designing Basics	22-Aug-26
16	Web Development Process	25-Aug-26
17	Web Publishing	27-Aug-26
18	HTTP Protocol	29-Aug-26
19	URL and Domain Registration	01-Sep-26
20	Web Browsers	03-Sep-26
21	Web Servers	05-Sep-26
22	Introduction to HTML	08-Sep-26
23	HTML Document Structure	10-Sep-26
24	HTML Text Formatting	12-Sep-26

Lec No.	Topic	A
25	HTML Lists and Hyperlinks	16-Sep-26
26	HTML Images and Multimedia	18-Sep-26
27	HTML Tables	21-Sep-26
28	Introduction to CSS	23-Sep-26
29	Inline Style Sheets	25-Sep-26
30	Internal Style Sheets	28-Sep-26
31	External Style Sheets	30-Sep-26
32	Formatting Text with CSS	03-Oct-26
33	Formatting Paragraphs with CSS	06-Oct-26
34	Displaying Graphics with CSS	09-Oct-26
35	Webpage Layout Design	13-Oct-26
36	Navigation Menus and Links	16-Oct-26
37	Area-Based Layouts	20-Oct-26
38	Creating and Formatting Tables	23-Oct-26
39	HTML Forms with JavaScript	27-Oct-26
40	Embedding External Content	30-Oct-26
41	Publishing Web Pages	17-Nov-26
42	HTML for Email	20-Nov-26
43	Creating Views	24-Nov-26
44	Dictionary Views	28-Nov-26
45	Advanced Subqueries and Data Manipulation	03-Dec-26

Lab Plan –FOW (P)

Lab No.	Lab Experiment	A
1	Basic HTML Page Structure	23-Jul-26
2	Text Formatting with HTML Tags	31-Jul-26
3	Working with Fonts, Colors, and Headings	08-Aug-26
4	Creating Paragraphs, Superscript, and Preformatted Text	13-Aug-26
5	Creating Ordered, Unordered, and Definition Lists	18-Aug-26
6	Using Horizontal Lines and Special Characters	24-Aug-26
7	Creating Hyperlinks and Email Links	26-Aug-26
8	Working with Images and Image Links	05-Sep-26
9	Creating Internal Page Navigation	14-Sep-26
10	Applying Inline, Internal, and External CSS	17-Sep-26
11	Using CSS Selectors (Class, ID, HTML)	21-Sep-26
12	Working with CSS Text, Font, and List Properties	24-Sep-26
13	Applying CSS Box Model (Margin, Padding, Border)	03-Oct-26
14	Creating Tables with Formatting	13-Oct-26
15	Creating Registration Forms with Validation	22-Oct-26
16	Working with Background Images and Thumbnails	31-Oct-26
17	Styling Hyperlinks Using CSS	18-Nov-26
18	Building a Complete Web Page	24-Nov-26
19	HTML and CSS Mini Project	26-Nov-26
20	Student Registration Form with Validation	05-Dec-26

Lesson Plan –Fundamentals of Computer & PC (T)

Lec No.	Topic	A
1	Introduction to Computer	20-Jul-26
2	Characteristics of Computers	22-Jul-26
3	Computer Architecture	24-Jul-26
4	Input and Output Devices	27-Jul-26
5	Generations of Computers	29-Jul-26
6	Types of Computers	31-Jul-26
7	Applications of Computers	03-Aug-26
8	Introduction to Computer Languages	05-Aug-26
9	Evolution of Programming Languages	07-Aug-26
10	Types of Programming Languages	10-Aug-26
11	Characteristics of Programming Languages	12-Aug-26
12	Input Devices	14-Aug-26
13	Output Devices	18-Aug-26
14	Character Recognition Devices (OCR, OMR, MICR, Barcode Reader)	20-Aug-26
15	Computer Software and Categories	22-Aug-26
16	Introduction to Number Systems	25-Aug-26
17	Decimal, Binary, Octal and Hexadecimal Systems	27-Aug-26
18	Number System Conversions	29-Aug-26
19	Binary Arithmetic Operations	01-Sep-26
20	Binary Complements and Subtraction	03-Sep-26
21	BCD and Gray Code	05-Sep-26
22	Fixed Point and Floating Point Representation	08-Sep-26
23	Introduction to Logic Gates	10-Sep-26
24	Basic Logic Gates	12-Sep-26

Lec No.	Topic	A
25	Derived and Universal Gates	16-Sep-26
26	Combinational Logic Circuits	18-Sep-26
27	Half Adder and Full Adder	21-Sep-26
28	Half Subtractor and Full Subtractor	23-Sep-26
29	Flip-Flops (SR, D, JK, T, Master-Slave)	25-Sep-26
30	Encoders, Decoders, Multiplexers and Demultiplexers	28-Sep-26
31	Introduction to Memory Management	30-Sep-26
32	Primary Memory (RAM and ROM)	03-Oct-26
33	Memory Hierarchy	06-Oct-26
34	Secondary Storage Devices	09-Oct-26
35	Magnetic and Optical Storage Devices	13-Oct-26
36	USB and Large Capacity Storage Devices	16-Oct-26

Details of Value-Added Courses and Professional Courses

Sr. No.	Name of Course	Prof. Name	Registration Link
1	Introduction to UI/UX	Dr. Ramchandran	Registration Form

227851 – Introduction to UI/UX

Course: BCA / B.Sc. (IT) / IMCA Semester–1

Prerequisite

Students should have basic knowledge of computer fundamentals and be comfortable using digital devices, web, and mobile applications. An understanding of basic software interfaces and user interaction concepts will be beneficial. No prior experience in UI/UX design is required; however, an interest in creativity, design thinking, and user-centered problem solving is expected.

Rationale

This course provides foundational knowledge of UI/UX design, enabling students to create user-friendly and visually appealing digital products. It emphasizes user-centered design, usability, and accessibility through practical activities and real-world case studies. The course prepares students for industry roles by developing design thinking, prototyping skills, and portfolio-based project experience.

Course Content

Sr.	Topics	Hrs.
1	**Module 1: Foundations of UI/UX** • UI & UX – Difference between User Interface and User Experience • Importance of UI/UX in digital products • Real-life examples of good and poor UI/UX • **Lab Work:** Review three applications and identify three good and three poor design choices.	4
2	**Module 2: User-Centered Design** • Understanding user needs and behaviors • Basics of user psychology in design • User research methods: surveys, interviews, observations • User personas • Journey mapping • **Lab Work:** Create a persona and journey map for an e-commerce application.	5

Continued on next page

Sr.	Topics	Hrs.
3	**Module 3: Visual Design and UI Elements** • Principles of visual design: colors, typography, icons, spacing, balance • Layout and alignment • UI components: buttons, forms, navigation bars, modals • Design systems and consistency • **Lab Work:** Redesign a poorly designed form or application screen.	5
4	**Module 4: Wireframing and Prototyping** • Low-fidelity and high-fidelity wireframes • Introduction to Figma and Adobe XD • Creating wireframes from sketches to digital mockups • Interactive prototypes • **Lab Work:** Build a wireframe and prototype for a mobile login and dashboard flow.	5
5	**Module 5: Usability, Testing and Accessibility** • Usability principles • Usability testing methods • Accessibility in UI/UX • Inclusive design • **Lab Work:** Test classmates' prototypes and provide usability feedback.	5
6	**Module 6: Trends, Tools and Career Pathways** • Current UI/UX trends • Case studies of successful applications • Career opportunities in UI/UX • **Lab Work:** Present wireframes, prototypes and case studies.	3
7	**Module 7: Capstone Project** • Design a complete UI/UX solution for a small application such as a food delivery app, learning portal or portfolio website.	3
	Total	**30**

Reference Books

1. **Don't Make Me Think** – Steve Krug.
2. **The Design of Everyday Things** – Don Norman.
3. **Lean UX** – Jeff Gothelf.
4. `https://www.figma.com`

Course Outcomes

After successful completion of this course, students will be able to:

1. Understand the principles of UI/UX design and the importance of user-centered approaches in digital product development.

2. Analyze user needs and behaviors using techniques such as user personas and journey mapping.
3. Design effective user interfaces by applying visual design principles, wireframing, and prototyping using tools such as Figma or Adobe XD.
4. Evaluate and improve digital interfaces through usability testing, accessibility considerations, and real-world project implementation.

Co-curricular and Extra-curricular Events During the Semester

CSR Activity (Monthly Basis):
Each Department must plan **minimum one CSR activity** on a monthly basis.

No.	Name of Activity	Defined Month/Day
1	Computer Literacy Program - Raval Village	Every 2nd and 4th Tuesday
2	International Youth Day (HP)	09/08/2026
	Gender Equality Day (SC)	14/08/2026
	World Humanitarian Day (AP)	19/08/2026
	Technical Event – TEC (MT)	29/08/2026
	National Sports Day (MP)	29/08/2026
	Alumni Meet (FRK, PP)	02/09/2026
	Teachers Day (KK)	05/09/2026
	National Hindi Divas (SK)	14/09/2026
	NSS Day Celebration (SP)	24/09/2026
	Digital Literacy & Cyber Safety Awareness Day (Aniket)	26/09/2026
	Financial Literacy Session (AKS)	29/09/2026
	Photography Contest (TS)	01/10/2026
	AI for Beginners (NS)	06/10/2026
	Swachh Campus Initiative (SP, HP)	10/10/2026
	Quiz Competitions (SR)	14/11/2026
	Photography Contest (TS)	01/10/2026

Library-Self Study Activities:

- Pick and Write Event
- Session for E-Resources Awareness

Details of Visits Planned During Semester

- **Note:** For Semester 1, industrial visits will not be conducted this term. As per academic planning, they will be scheduled in the following semester.

Details of Workshop During the Semester

No.	Title of Workshop	Planned Date
1	Web Designing & C Programming workshop	1st Week of Aug 2026
2	Subject-wise Faculty Workshop	1st Week of September 2026
3	Seminar on IPR	2nd Week of Aug 2026
4	Activity on Tolerance and Harmony towards Cultural, Regional, Linguistic, Communal, Socio-economic	4th Week of Sept 2026
5	Activity on Constitutional Obligations, Values, Rights, Duties, and Responsibilities of Citizens	1st Week of September

Details of Expert Talks During the Semester

No.	Name of Expert	Expert Affiliation	Sem	Related Subject	Planned Date
1	Dr. Harshika Rana	Data Analyst, Rishabh Software, Vadodara	1	FOW	2nd Week of September
2	Mr. Manish Vala	SSN Infotech, Surat	1	FOC	3rd Week of September

3	Prof. Karuna Patel	Assistant Professor, MSU, Vadodara	1	Fundamental of Computer and PC	4th Week of September

Flagship Events of Concerned Institute, Faculty and University

No.	Title of Seminar	Planned Date
1	International Conference	4th Week of July 2026
2	Udaan	4th Week of August 2026

Prominent academic competition (Outside PU)

EXAMINATION RULES & REGULATIONS FOR STUDENTS:

If any examinee is violating university rules, he/she is liable to be punished under the provisions of the University rules.

- A candidate has to check the bar-code to be pasted by the supervisor on the front page of his answer book.
- Enter your enrolment number, subject code, date of exam etc. in the given space.
- Students should ensure that any objectionable material leading to a UFM case is not lying around his/her seat prior to the start of the examination, and it will be the sole responsibility of the student to inform the supervisor.
- A disciplinary action will be taken against the candidate who disobeys the instructions of the supervisor or misbehaves or violates the code of conduct of examination of Parul University.
- All unused answer books and other University examination materials must be handed over to Supervisor and must **NOT** be taken from the room.
- Hollow sticker should be pasted after the warning bell on the appropriate space on the front page of the answer book, covering the information filled up by the candidate and the bar-code label.
- There will be a warning bell 10 minutes before the completion of the examination.
- If you need to do any rough work, use the back of the page(s) of your answer book(s) and either cross out the rough work or mark it clearly as such before submitting your script; you may not use paper of your own for rough work.
- No candidate will be allowed to leave the examination hall before 45 minutes after the commencement and during the last 15 minutes of the examination session.
- Do not leave your seat under any circumstances without the prior permission of the supervisor.
- Do not write anything in the space provided for marks.
- Write relevant answers of the questions in clear and legible handwriting on both sides of the answer book in respective Section-A and Section-B.
- Begin a new answer on a separate page.
- Please read the instructions at the top of your paper, and make sure you understand and follow them.
- Under no circumstances will the candidate be allowed to enter the examination hall after commencement of the examination.
- Please check that you have the correct examination paper and that your copy is complete.
- Do not write your name or number or sign in the answer book which reveals your identity.

- A candidate has to check the bar-code to be pasted by the supervisor on the front page of his answer book.
- Enter your enrolment number, subject code, date of exam, etc. in the given space.
- Students should ensure that any objectionable material leading to a UFM case is not lying around his/her seat prior to the start of the examination, and it will be the sole responsibility of the student to inform the supervisor.

PARUL UNIVERSITY
WAGHODIA, VADODARA

No: PU/EXAM/Functions/2015/5 **Date: 18/08/2015**

Instructions to Examinees/Candidates

1. All candidates must occupy their seats in the exam hall before half an hour of the commencement of the examination time.
2. Students should ensure that any objectionable material leading to a UFM case is not lying around his/her seat prior to the start of the examination, and it will be the sole responsibility of the student to inform the supervisor.
3. Enter your enrollment number, subject code, date of exam, etc. at the appropriate location.
4. A candidate has to check the barcode to be pasted by the supervisor on the front page of his answer book.
5. Do not write your name or number or any sign in the answer book which reveals your identity.
6. Please check that you have the correct examination paper and that your copy of it is complete.
7. Under no circumstances will the candidate be allowed to enter the examination hall after commencement of the examination.
8. Please read the instructions at the head of your paper and make sure you understand and follow them.
9. Begin a new answer on a separate page.
10. Write relevant answers to the questions in clear and legible handwriting on both sides of the answer book in respective Section-A and Section-B.
11. Do not write anything in the space provided for marks.
12. Do not leave your seat under any circumstance without the prior permission of the supervisor.
13. No candidate will be allowed to leave the examination hall after the commencement of the examination till 45 minutes and during the last 15 minutes of the examination session.
14. Students may not leave the examination room (except when they have finished their examination). If the medical condition appears serious and the student is not able to resume the exam, the Jr. Supervisor should call Security and request medical assistance. In this case, the student may be able to resume the examination.

15. If you need to do any rough work, use the back page(s) of your answer book(s) and either cross through the rough work or identify it clearly as such before handing in your script; you may not use paper of your own for rough work.
16. It is the students' responsibility to make sure their calculators are working and have fresh batteries. Students are neither permitted to share calculators nor to pass them between each other during an examination. Use of a non-permissible type of calculator or other electronic device will be regarded as cheating.
17. If any objectionable material related to the exam or mobile phone or programmable calculator is found with a candidate, or if found exchanging answer book/question paper with another candidate, he/she will be immediately expelled and final punishment will be imposed once the matter is taken up by the authorities.
18. There will be a warning bell 10 minutes before the completion of the examination.
19. Hollow sticker should be pasted after the warning bell at the appropriate place on the front page of the answer book, covering the information filled up by the candidate and the barcode label.
20. All unused answer books and other University examination materials must be handed over to the Supervisor and must **NOT** be taken from the room.
21. Disciplinary action will be taken against the candidate who disobeys the instructions of the supervisor or misbehaves or violates the code of conduct of examination of Parul University.
22. If any examinee is violating university rules, he/she is liable to be punished under the provisions of the University rules.

- Controller of Examination

Centre for Distance and Online Education (CDOE)

Backdrop

The Centre for Distance & Online Education (CDOE) at Parul University is committed to democratizing access to quality higher education by leveraging flexible, technology-enabled learning modes. Our mission is to empower learners—especially working professionals, remote learners, and lifelong learners—with UGC-approved, digitally delivered programmes that maintain the highest academic standards.

Key Features & Strengths

- **UGC-Recognized & Regulated:** The programs offered under CDOE comply with UGC (OL & ODL) regulations, ensuring equivalence with regular-mode degrees.
- **NAAC A++ Accredited University:** Parul University's institutional reputation adds strength and credibility to its distance and online program offerings.
- **Diverse Program Portfolio:** CDOE offers a wide range of undergraduate and postgraduate online and distance programs—spanning Arts, Commerce, Science, Management, Computer Applications, and more.
- **Flexible Learning Mode:** Examinations for online learners are conducted in online mode to suit remote learners.
- **Scholarship & Dual Degree Options:** Offered programs include scholarship options and dual degree opportunities to maximize value for students.
- **Global & Virtual Exposure:** Through virtual classrooms and global exchange programs, learners gain exposure to international perspectives and best practices.

Why Choose CDOE, Parul?

- **Accessibility & Convenience:** Learn from anywhere, anytime, without needing to relocate to campus.
- **Quality & Credibility:** Degrees awarded are recognized and equivalent to traditional formats under UGC norms.
- **Industry-Relevant Curriculum:** Programs are designed to meet evolving industry needs, with input from domain experts and faculty.
- **Learner Support & Resources:** Digital libraries, faculty mentors, technical support, and online study materials ensure smooth learning experiences.
- **Career Advancement & Upskilling:** Ideal for professionals aiming to progress in their careers without interrupting work commitments.

Parul University Alumni Association

The Parul University Alumni Association (PUAA) proudly represents a global family of over 80,000 alumni across 38 constituent institutions, creating a lifelong network that connects graduates with their peers, mentors, and the University. PUAA serves as a bridge between the past and the present, fostering collaboration, mentorship, and professional growth while celebrating the achievements of our alumni community across the world.

Through its various initiatives, PUAA promotes knowledge sharing, career development, entrepreneurship, social impact, and global engagement, empowering every alumnus to contribute towards building a more innovative and inclusive future.

Our Chapters: Strengthening Global Bonds

PUAA has established 08 National and 25 International Alumni Chapters that act as local hubs of networking, mentorship, and collaboration, with many more upcoming chapters set to expand and enrich our global alumni network.

National Chapters:

- Vadodara Chapter,Ahmedabad Chapter, Rajkot Chapter, Surat Chapter, Udaipur Chapter, Navsari Chapter, Hyderabad Chapter, Pune Chapter, Mumbai Chapter, Dahod Chapter

International Chapters:

Student–Alumni Engagement Initiatives

PUAA actively bridges the gap between students and alumni through various programs focused on learning, growth, and career development.

- **Alumni Talk Series:** Alumni from diverse industries regularly visit the campus or connect virtually to share insights, experiences, and professional guidance with current students.
- **ASMP – Alumni Student Mentorship Program (Industry Connect):** A structured initiative pairing students with alumni mentors for personalized career guidance, higher

education support, and skill development.

- **HR Connect:** Alumni working in HR, recruitment, and corporate sectors collaborate with the University to provide placement opportunities and industry exposure.
- **Alumni Webinars & Industry Panels:** Interactive sessions where global alumni discuss emerging trends, innovation, and career paths.
- **Entrepreneur Connect:** Alumni entrepreneurs inspire students to explore startup ideas, innovation, and business leadership.
